

STROKE:

Remember

The 1st Three Letters.... S.T.R.

My nurse friend sent this and encouraged me to post it and spread the word.

I agree.

If everyone can remember something this simple, we could save some folks.

Seriously..

Please read:

STROKE IDENTIFICATION:

During a BBQ, a friend stumbled and took a little fall - she assured everyone

that she was fine (they offered to call paramedics) ..she said she had

just tripped over a brick because of her new shoes.

They got her cleaned up and got her a new plate of food. While she appeared

a bit shaken up, Ingrid went about enjoying herself the rest of the evening

Ingrid's husband called later telling everyone that his wife had been taken

to the hospital - (at 6:00 pm Ingrid passed away.) She had suffered a stroke

at the BBQ. Had they known how to identify the signs of a stroke, perhaps

Ingrid would be with us today. Some don't die.... they end up in a helpless,

hopeless condition instead.

It only takes a minute to read this...

A neurologist says that if he can get to a stroke victim within 3 hours

he can totally reverse the effects of a stroke... totally. He said the trick was getting a stroke recognized, diagnosed, and then getting

the patient medically cared for within 3 hours, which is tough.

RECOGNIZING A STROKE

Thank God for the sense to remember the "3" steps, STR . Read and Learn!

Sometimes symptoms of a stroke are difficult to identify. Unfortunately, the lack of awareness spells disaster. The stroke victim may suffer severe brain damage when people nearby fail to recognize the symptoms of a stroke

Now doctors say a bystander can recognize a stroke by asking three simple questions:

S * Ask the individual to SMILE.

T * Ask the person to TALK and SPEAK A SIMPLE SENTENCE (Coherently)

(i.e. It is sunny out today)

R * Ask him or her to RAISE BOTH ARMS.

If he or she has trouble with ANY ONE of these tasks, call 999/911 immediately and describe the symptoms to the dispatcher.

New Sign of a Stroke ----- Stick out Your Tongue

NOTE: Another 'sign' of a stroke is this: Ask the person to 'stick' out his tongue.. If the tongue is 'crooked', if it goes to one side or the other , that is also an indication of a stroke.

A cardiologist says if everyone who gets this e-mail sends it to 10 people; you can bet that at least one life will be saved.
